

ASIM RAZA

Junior Data Engineer

Gojra, Punjab, Pakistan | razaasim5700@gmail.com | linkedin.com/in/asimraza3768
github.com/asimraza3768 | asimbuilds.dev

PROFESSIONAL SUMMARY

Data Engineer with hands-on experience building automated ETL/ELT pipelines using Python, SQL, PySpark, Databricks, Delta Lake, Apache Airflow, and AWS S3, backed by 4 years of freelance web development experience. Skilled in REST API ingestion, dimensional modeling, data quality validation, and pipeline troubleshooting. Team lead in a national hackathon with strong communication and problem-solving skills. Seeking a Data Engineer role to build reliable, analytics-ready data platforms.

TECHNICAL SKILLS

Languages & Libraries: Python (pandas, Requests), SQL (joins, relational databases)

Data Engineering: ETL/ELT, Data Pipelines, Data Integration, Data Ingestion, Data Quality, Data Cleaning, Apache Airflow (DAGs), REST API Ingestion

Big Data: Apache Spark, PySpark, Delta Lake

Cloud & Platforms: AWS S3, Databricks, Unity Catalog, Databricks AI/BI, Snowflake SQL, Cloud Computing Concepts

Data Modeling & Warehousing: Dimensional Modeling, Star Schema, Data Warehousing, Relational Database Design, PostgreSQL

Tools: Git, GitHub, Python Testing (pytest), FastAPI, Software Engineering Principles

Professional: Team Leadership, Communication, Presentation, Problem Solving, Time Management

PROJECTS

Job Market Intelligence Platform | *Python, REST APIs, AWS S3, Databricks, PySpark, Delta Lake, SQL* **Sep 2026**

- Built automated REST API ingestion using cursor-based pagination, landing 400+ job listings in AWS S3.
- Designed a 3-layer ETL pipeline with 4 automated workflow tasks, producing 6 curated analytics datasets.
- Implemented data quality checks for required fields, duplicates, salaries, timestamps, remote values, and country codes.
- Implemented MERGE-based upserts and deduplication to keep job records consistent across all 3 layers.
- Diagnosed the root cause of API failures, restoring ingestion from HTTP 400 errors to successful 200 responses.

Weather Data Engineering Pipeline | *Python, PySpark, Databricks, Delta Lake, Databricks SQL* **Aug 2026**

- Built automated REST API ingestion pipelines for 5 cities using Python, PySpark, and Databricks.
- Developed ETL workflows that transform raw weather data into analytics-ready Delta Lake datasets.
- Added data quality validation to catch integration and transformation issues before analytics.
- Designed a star schema and queried Gold Delta tables using Databricks SQL.

WORK EXPERIENCE

Freelance WordPress Developer **2022 – 2026**

- Designed, built, and delivered 3–4 WordPress websites for client projects.
- Worked with MySQL databases, custom themes and plugins, and third-party REST API integrations.
- Troubleshooted performance, security, and data issues to keep live sites stable.

Front Counter Associate | *Bonsaii Restaurant, Gojra* **May 2023 – Aug 2023**

- Processed cash, card, and POS transactions accurately and supported end-of-shift reconciliation.
- Prepared daily expense sheets to track and record all transactions and expenditures.

HACKATHON & LEADERSHIP

Team Lead & Data Engineer | *Sentinel AI, Qabil Bano Pakistan (National Hackathon)* **2026**

- Led a team through 2 selection stages of a national hackathon to build Sentinel AI, a web platform that predicts localized flood risk and coordinates emergency response; regional rounds upcoming.
- Ingested live weather data from the Open-Meteo API (17 climate predictors) to feed an XGBoost model that returns probabilistic flood risk scores.
- Built FastAPI (Python) REST endpoints with role-based access control for citizens, relief NGOs, and administrators.
- Implemented Haversine-based geospatial threat detection on a React and Leaflet.js map, and created presentation decks to communicate the solution.

EDUCATION

Bachelor of Computer Science (BSCS), Virtual University of Pakistan **2022 – Expected 2027**

CERTIFICATIONS

DataCamp: Data Engineer in Python; Associate Data Engineer; Associate Data Engineer in SQL; Introduction to Apache Airflow in Python; ETL and ELT in Python; Introduction to Snowflake SQL; Data Warehousing Concepts; Database Design; Software Engineering Principles in Python

Coursera: Introduction to Data Engineering (IBM); Python for Data Science, AI & Development (IBM); Successful Presentation (University of Colorado Boulder)

Virtual Experience (Forage): Deloitte Data Analytics Job Simulation; Deloitte Technology Job Simulation; BCG Data Science
